Profile	<p>I am highly skilled Microsoft SQL Server expert. I have 15+ years' experience in the IT services industry where I have held positions from developer to executive management. I have worked extensively with Microsoft SQL Server since '02 with versions 2000 through to 2012 in both production and development environments where technology has to be resilient, recoverable and flexible. In various leadership and individual contributor roles, my responsibilities included architecting, developing and configuring enterprise applications, hiring professionals and delivering results.</p> <p>Clear understanding of today's business needs desire for new challenges</p> <p>I have been involved with various types of Microsoft SQL Server based applications, such as high-performance, mission-critical, real-time transaction-processing systems, large-scale data archives, data warehousing applications. The databases were ranging from gigabytes to terabytes.</p> <p>12 years' experience developing ERP systems Enterprise Resource Planning</p> <p>I am particularly interested in designing and configuring relational database using Microsoft SQL Server 2008R2/2012. I would like to lead in the management, design, backup and control of production/development databases infrastructures, performance tuning, distribution and replication. I can provide technical support in the areas of database administration, data integrity, data repository administration, data replication, database backup and restore processes and reporting engines.</p> <p>Microsoft SQL Server 2012, C#, ASP.NET</p> <p>I have strong communication and self-management skills and have worked in complex and challenging environments. I have demonstrated the ability to work well under pressure to tight deadlines whilst maintaining strong relationships with management and colleagues. I have a strong grounding in support of production system and success in delivering projects in high pressured business atmospheres.</p> <p>I am a self-learner who is willing and able to acquire new skills quickly.</p> <p>Specialties: Market research, Finances, ERP</p> <p>I am looking for Microsoft SQL Server challenges and work that can force to deliver best out of me.</p> <p>Strong interest: Microsoft Technology stack with a heavy emphasis on Microsoft SQL Server.</p> <p>About me: http://sqlserver.lt/cvpro.asp</p>
Skills	<ul style="list-style-type: none">• SQL Server installation and setup of SQL 2000/ 2005/ 2008/ 2008R2/ 2012• SQL Server infrastructure and capacity planning• Logical and physical data modeling (tables, DML triggers, indexes, references, constraints, file groups)• Development a complex DB objects (stored procedures, functions, triggers and views)• Development of business applications logic using DB objects that serves screens and reports• Defining and maintaining best practices for database architecture and operations (DDL triggers)• Supporting developer staging area (testing) before production• Server security management – logins, users, roles, schemas• Designing database security policies• Disaster recovery planning

	<ul style="list-style-type: none"> • Configure SQL Server jobs monitoring, alerts, scripting and operators etc. • Planning for high availability • Planning and implementation of failover clustering for SQL Server • Implement database mirroring and HTTP End points • Implement database log shipping and replication • Troubleshooting (DBCC) and performance tuning, monitoring and maintenance (SQL profiler, execution plans, policy manager, resource governor, database tuning advisor and DMV) • Consolidation of SQL Server instances, databases and schemas • Import and export utilities (BCP, BULK inserts, SSIS etc.), ETL • Knowledge of Service Broker, SQL Mail • Solid experience developing reports with SQL Server Reporting Services (SSRS) • Knowledge of SQL Server Integration Services • Automation scripting, Visual Basic for Applications, C# and .NET technologies • Provide technical and functional support to desktop users • Administer and update Exchange server • Update Active Directory with new users, computers and security changes • Administration of DNS and DHCP with reservations for computers and hardware • Update Windows Servers 2003/2008 with OS patches, upgrades and software updates • Monitor Windows Servers for warnings and errors to prevent issues • Replace hardware in desktop and servers as needed • Providing 2nd level support to helpdesk • Studying and understanding of business needs, study of data sources/systems and understanding/preparing requirement documents and mapping to architecture • Strong command over team management and leadership • Oracle database migration to SQL Server database • Microsoft Azure cloud setup and maintenance
<p>Technologies</p>	<p>SQL Server 2012(2008R2/2008/2005/2000) C# .NET 4(3.5/3/2), VB.NET, Delphi ASP.NET (Classic) HTML, CSS, XML, XSL, JavaScript Navision 2009(3.7/3.6/3.1/2)</p> <p>Excellent knowledge of T-SQL. Solid experience using C#, Delphi. Moderate skills building web based solutions. Lots of practice programming Navision.</p> <p>GUI applications, Web applications, Web services, SOAP, TCP/IP sockets (TCP/UDP), COM/ActiveX, Windows NT services, AJAX, Integration solutions</p> <p>Windows Server 2008 R2(2003/2000) Windows 7(Vista/XP/2000/95) IIS7.5(6) Active Directory Exchange 2013(2010) Microsoft Office 2013(2010/2007/2003/XP/2000) Azure Amazon Web Services</p> <p>More than 9 years' experience developing automated ERP systems using Microsoft products</p> <p style="text-align: right;">Full list: http://sqlserver.lt/cvts.asp</p>
<p>Professional Experience</p>	<p>2011 - 2015: Beit, Vilnius Lithuania Business management IT solutions</p> <p>I am consultant, business analyst and architect of IT solutions based on Microsoft technology stack. On daily basis I gather business requirements by working closely with clients' personnel and top management. I suggest efficient solutions to automate business processes by creating sketches and demonstrating their potential. I negotiate contracts and then deliver projects within agreed budget and time specifications from initiation to realization.</p> <p>I am responsible for the whole solution's life cycle. All solutions are developed using Microsoft technologies – C# & SQL Server or/and Navision.</p> <p>still working SQL Server 2012/2008R2, Sybase 12, C# .NET 4.5/4.0/3.5/2.0, Navision 2009/4/3.10/3.60, ASP.NET, Delphi 2010, XML+SOAP, HTML+CSS, JavaScript</p>

2004 - 2011: WorldOne Research, London UK, Vilnius Lithuania | Market research
I was ERP solution architect. I created two versions of the solution. I led my team to the development of third version. The solution let company to complete market research projects on time and cut expenses to the minimum.

The ERP solutions covered all business processes in multicultural and multilingual environment. Excel and paper sheets used extensively before were replaced with IT technologies. 5 worldwide branches, more than 200 employees were intensively working with the solutions on daily basis. More than 300'000 incentives automatically paid on yearly basis. Millions of emails sent to respondents inviting to participate in market research projects on monthly basis. Company became a leading player in healthcare and pharmaceutical market research industry with revenue more than £40 million by using these solutions.

6.5 years | SQL Server 2008R2/2005/2000, C#, Delphi, ASP, HTML+CSS, JavaScript, XML+XSL, Navision

2004 - 2005: Falck security(G4S), Vilnius Lithuania | Security solutions

I was Navision programmer. I enhanced current business management system by developing custom modules for physical security, cash services and management of AT Ms. My responsibilities were to design and implement client's needs.

Less than 1 year, parallel work | Navision, Delphi

2002 - 2004: Sonex Sistemas, Vilnius Lithuania | Business management systems

I was Navision consultant and programmer. My responsibilities were to design, code and setup business management modules for the clients. I participated in development of business management solutions for various industries and integrations with third-party systems. I consulted clients on optimizing IT systems and automation of business processes.

2 years | Navision, Delphi, SQL Server 2000

1998 - 2002: Edrana, Vilnius Lithuania | Business management systems

I created and managed fixed asset accounting application - Turtas 2000. I was responsible for the development of this product.

4 years | Delphi, Paradox, Firebird, Interbase, Sybase, HTML, ASP

Certificates

2013-09: Programming in HTML5 with JavaScript and CSS3

Microsoft 70-480 | Certification E377-8913 | Programming in HTML5 with JavaScript and CSS3 Specialist

2013-08: T S: Windows Applications Development with Microsoft .NET Framework 4

Microsoft 70-511 | Certification E369-3518 | .NET Framework 4, Windows® Applications

2013-07: Transition Your MCITP: Database Administrator 2008 or MCITP: Database Developer 2008 to MCSE: Data Platform

Microsoft 70-459 (based on 70-464 and 70-465) | Certification E344-4861 (Data platform) | Microsoft® Certified Solutions Expert

2013-07: Transition Your MCTS on SQL Server 2008 to MCSA: SQL Server 2012, Part 2

Microsoft 70-458 (based on 70-462 and 70-463) | Certification E337-7698 | Microsoft® Certified Solutions Associate

2013-07: Transition Your MCTS on SQL Server 2008 to MCSA: SQL Server 2012, Part 1

Microsoft 70-457 (based on 70-461 and 70-462)

2013-05: Programming in C#

Microsoft 70-483 | Certification E284-9495 | Microsoft Specialist

2011-08: Microsoft SQL Server 2008, Implementation and Maintenance

Microsoft 70-4320

2011-08: T S: Microsoft SQL Server 2008, Database Development

Microsoft 70-433 | Certification D437-8786 | Microsoft® Certified IT Professional (MCITP)

2011-07: PRO: Designing, Optimizing and Maintaining a Database Administrative Solution Using Microsoft SQL Server 2008

	<p>Microsoft 70-450</p> <p>2011-07: PRO: Designing Database Solutions and Data Access Using Microsoft SQL Server 2008 Microsoft 70-451</p> <p>2009-06: TS: Microsoft® SQL Server™ 2005 - Implementation and Maintenance Microsoft 70-431 Certification A990-1543 Microsoft® Certified Technology Specialist (MCTS)</p> <p>2006-09: Developing and Implementing Windows®-based Applications with Microsoft® Visual C#™ .NET and Microsoft® Visual Studio® .NET Microsoft 70-316</p> <p>2006-04: Designing and Implementing Databases with Microsoft® SQL Server™ 2000 Ent.
